The following few steps are about how to export and import Contact from Vista Windows Mail to hiBox webmail.

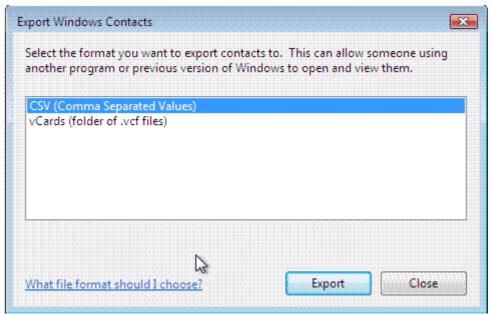

1.Select "Windows Contact" in "All Programs" menu.

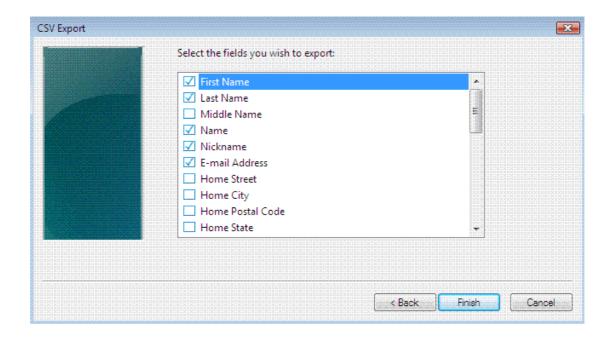

2. Click **Export** in "Windows contact" window

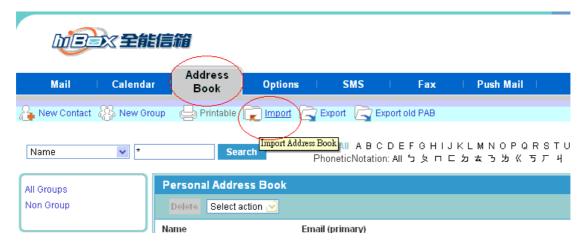

3. Select "CSV" format and then click on "Export" button

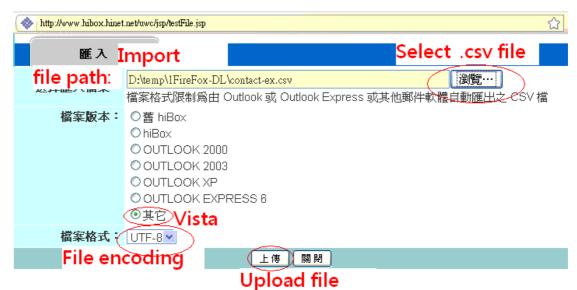

4. Select contact fields you want, and click "Finish" to generate a contact file.

5. Log on to Webmail, Click "Address Book" on top banner, and then click "Import"

- 6. Upload the exported contact file
- 6.1 Select the the path of exported contact file
- 6.2 Select Vista for Vista Windows Mail
- 6.3 Select UTF-8 for the file encodeing
- 6.4 Click Upload

- 檔案格式限制爲由Outlook或Outlook Express或其他郵件軟體目動進出副檔名爲.CSV之檔案。
- 將匯出之通訊錄CSV檔上傳至本系統,且CSV檔中不可有單引號'或雙引號"。
- 若匯入失敗的原因爲<mark>「失敗的標頭</mark>」,則請參考系統公告「匯入通訊錄 」內容中第六頁說明,並重新匯出 一次您的聯絡人清單。
- 7. After uploading contact file, next step is to match exported file's contact fields against System's

The field-match page is divided into 2 parts, the contact fields of left part are on system, the right part is for exported contact file.

After finishing fields match, click on Save to save the configurations.

8. After saving the configurations, a window of import result pop up showed in below picture.
